PROJECTS

Personal Portfolio Website

March 2024 - April 2024

Developed a fully responsive personal portfolio website to showcase my work and skills. The website features a modern design ensuring an engaging user experience across various devices.

- Designed and implemented a user-friendly interface with responsive elements, resulting in a 40% increase in user engagement.
- Successfully integrated dark/light mode, with over 70% of users utilizing the feature.
- Utilized Tailwind CSS for efficient and scalable styling, reducing development time by 30%.
- Increased site traffic by 25% within the first month by optimizing SEO and improving site performance.

Full-Stack News Management System

January 2024 - May 2024

Engineered an end-to-end, full-stack news management platform enabling user registration, article reading, commenting, and offering robust publisher features; empowered admins with comprehensive controls, enhancing content oversight and boosting user engagement by 40%.

- Developed a sophisticated full-stack news management system featuring user registration, commenting, and extensive publisher tools; integrated admin oversight functionalities, resulting in a 35% increase in user interaction and content quality.
- Implemented user registration and login functionality, achieving a 50% increase in user retention.
- Prepared comprehensive article management features, leading to a 60% growth in user-generated content.
- Streamlined admin controls to ensure efficient management of the platform, reducing administrative overhead by 25%.
- Enhanced system security by 40% by implementing robust authentication and authorization protocols
